Hager, Karl-Fried,
EXPERIMENTAL STUDIES OF AIR FRICTION IN SPINNING POTS. [1962] [19]p. 33 refs.
Order from SLA $1.60 62-14585

Trans. of Faserforschung und Textiltechnik (Germany) 1956, v. 7, [no. 8] p. 339-345.

DESCRIPTORS: *Gas flow, Resistance, *Friction, *Textile industry, Electric machinery, Mathematical analysis.

The higher electrical energy requirement of pot spinning machines in contrast to the bobbin spinning process is principally caused by friction losses owing to the air flow at the wall of the pot. The air resistance of a spinning pot with and without a jacket was calculated and estimated by experiments. Formulas for the air resistance and experimentally determined coefficients were developed, which made possible a survey of the air friction losses of spinning pots of various dimensions for designing purposes. Hagino, K.
SPECTROPHOTOMETRIC DETERMINATION OF MINUTE AMOUNTS OF NITRATE ION. [1962] 9p. (8 figs. omitted) 3 refs.
Order from SLA $1.10 62-16517

Trans. of [Nihon] Kagaku Zasshi (Japan) [1961] v. 82, p. 841-845.

DESCRIPTORS: *Spectrographic analysis, Colorimetric analysis, Ions, *Nitrates, Ammonia, Zinc, Magnesium compounds.

The NO_2 ion was prepared by reduction of NO_3 with zinc in aqueous ammonia, and complexed for colorimetry by Griess-Romijn (GR) reagent. Aqueous ammonia and metallic zinc were added to the sample solution; NO_2 was produced by shaking a constant number of times. After centrifugal separation, HCl was added to the filtrate; neutralization was then effected
(Chemistry--Analytical, TT, v. 8, no. 7) (over)

PHOTOELECTRIC AND OPTICAL PROPERTIES OF Sb-Cs AND Sb(Mg)-Cs FILMS. [1960] 24p. 11 refs. Order from SLA mi$2.70, ph$4.80 60-18118

Trans. of Oyo Butsuri (Japan) 1959, v. 28 [no. 12] p. 711-720.

Experimental data suggest that the mechanism of dark current reduction in photomultiplier tubes is related to an increase of the acceptor density caused by the addition of Mg and not to a lowering of the Fermi level by the addition of other elements as postulated by W. E. Spicer (RCA Rev. 19: 555, 1958)
